---

## CAREER SUMMARY

Cybersecurity student with hands-on experience in penetration testing, vulnerability assessment, and web application security through Hack The Box, TryHackMe, PortSwigger, and OverTheWire. Hands-on experience in reconnaissance, enumeration, privilege escalation, and network analysis using tools including Nmap, Burp Suite and Wireshark. Strong problem-solving mindset with a keen interest in offensive security and continuous learning.

## EDUCATION

|                                                                                            |           |
|--------------------------------------------------------------------------------------------|-----------|
| Bachelor in Technology (B.Tech) in Computer Science Engineering   MIT ADT University, Pune | 2023-2027 |
| CGPA: 8.5/10                                                                               |           |
| Class 12 <sup>th</sup> ISC, Science Stream (75% in boards)   Vapi Public School, Vapi      | 2021-2023 |
| Class 10 <sup>th</sup> ICSE (90% in boards)   Vapi Public School, Vapi                     | 2011-2021 |

## TECHNICAL SKILLS

- Security Tools: Nmap, Wireshark, Burp Suite
- Platforms: Kali Linux, Linux, Windows
- Programming: Python (Basic), Bash (Basic)
- Concepts: Network Security, Web Application Security, Vulnerability Assessment, Enumeration

## PROJECTS AND EXPERIENCE

### Offensive Security Labs (HackTheBox, TryHackMe, Portswigger, OverTheWire)

- Performed reconnaissance, enumeration, vulnerability assessment, exploitation, and privilege escalation across Linux and web application labs.
- Conducted penetration testing using Hack The Box, TryHackMe, PortSwigger, and OverTheWire to strengthen offensive security techniques.
- Documented attack methodology and findings while improving analytical and problem-solving skills.

### 24-Hour Cybersecurity Hackathon

- Collaborated in a team to analyze security data using Splunk
- Gained exposure to SIEM tools, log analysis, and real-time threat detection
- Worked collaboratively in a fast-paced environment to investigate security events and support incident analysis.

### Smart India Hackathon Participant

- Participated in a national-level innovation competition and secured position under Top 300.
- Collaborated with team members to design and develop a technical solution under strict deadlines.
- Strengthened analytical thinking, communication, and collaborative problem-solving skills.

## CERTIFICATION

|                                                           |      |
|-----------------------------------------------------------|------|
| NPTEL – Ethical Hacking                                   | 2025 |
| Deloitte Cyber Job Simulation                             | 2025 |
| Networking Basics – Cisco Networking Academy              | 2025 |
| AWS Academy Graduate - Cloud Foundations - Training Badge | 2025 |
